

### HV320-RS485I-V2

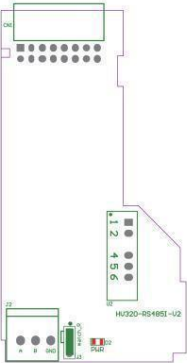

**Product Introduction**

HV320-RS485I-V2 communication card provides 485 communication for HV320-V2 series inverter  
 Specially developed for this function, using isolation solution to block external interference, electrical parameters Comply with international standards, users can choose according to their needs to achieve remote serial port control the inverter operation and parameter setting.

Interface layout and description

HV320-RS485I-V2 interface layout

HV320-RS485I-V2 Interface Description

Terminal marking	Terminal name					
J2	A	RS485+	<table border="1"> <tr> <td>A</td> <td>B</td> <td>GND</td> </tr> </table>	A	B	GND
	A	B		GND		
	B	RS485-				
GND	GND					

HV320-RS485I-V2 Jumper Instructions

Terminal marking	Terminal name	Functional Description	Jumper Description
J3	Terminal resistor select Jumper	No resistor	
		With resistor
